THE VISION THAT ARRIVES BEFORE THE WORLD

There are artworks that follow the market, and artworks that shape it.
My painting belongs to the latter: it opens paths, it defines direction.
This new phase marks the beginning of a higher cycle: a revelation of collective force
pulsing beneath the surface of reality.

Each work is a passage - a threshold between order and chaos, spirit and matter,
light and unspoken possibilities.

I speak to allies of vision: individuals who recognize what calls them forward.
Those who invest here embrace a form of symbolic power that continues to work within,
like a spark expanding its reach.

True luxury vibrates in intimacy: a presence that looks at you and asks for truth.
Choosing a work means choosing a personal transformation.
My canvases speak to those who are already ahead.
To the ones who move the world.
To those who choose risk as a springboard into a wider self.
This 2024–2025 collection is a celebration of courage, imagination,
and the instant in which you decide to become more than you were one minute ago.

This is not a purchase. It is the delivery of a piece of the future - perfectly unique.
You have the freedom to welcome it into your space in the very moment you feel it has
recognized you.

LIFE — *The Immortality of Consciousness*

Mixed media on shaped wooden panel - 170 x 90 cm max. - 2025

This is not a work. It is an organism in ascent.
Here, matter bends to the will of the spirit,
the support itself becomes an evolving body,
form becomes life that decides to expand.
Life is the moment in which the human being
crosses the boundary between what is alive and what is forever.
